## PROFESSIONAL EXPERIENCE

---

### Augusto Digital

*AI Workflow Engineer*

**Grand Rapids, MI, USA**

*December 2025 - Present*

- Driving the design and delivery of scalable automation and AI-powered services using n8n, Python, and modern LLM platforms.
- Built task-specific AI agents and API-driven workflows integrating Front.com, openAI, and more for custom services.
- Partnered with cross-functional teams to translate abstract product ideas into practical, intelligent systems with minimal oversight.

### Amastay AI

*Founding Full-Stack Engineer (Remote)*

**San Francisco, CA, USA**

*March 2025 - Present*

- Built the POC that lives at <https://demo.amastay.ai> as well as the main NextJS dashboard for users to manage their properties.
- Developed Node JS backend with Firebase and Gemini AI (genkit)
- Created Genkit-powered workflow tools so our AI assistant can open new service tickets end-to-end, using Zod schemas for guardrails

### Ridecell

*Senior Frontend Engineer (Remote)*

**San Francisco, CA, USA**

*January 2018 - October 2024*

- Shipped next-generation shared-mobility solutions internationally for a Fortune Global 500 company
- Delivered and maintained many products ranging from fleet-management automation workflows to short-term rental booking applications

### Indiana University - Bloomington

*Senior Frontend Engineer*

**Bloomington, IN, USA**

*July 2015 - January 2018*

- Built and supported internal data-processing/management tools and dashboards
- HIPAA/FERPA-compliant practices
- Interfaced web-based applications with Tableau/Denodo for complex data analysis and retrieval

### Grand Valley State University

*Server Support Technician*

**Allendale, MI, USA**

*August 2010 - July 2015*

- Provisioned and maintained physical servers
- Wrote automation scripts for maintenance tasks

## PROJECTS & OUTSIDE EXPERIENCE

---

### o11n - AI augmented IDE - [Link to project](#)

*Creator/Developer*

**Grand Rapids, MI, USA**

*April 2025 - Present*

- Designed and created from the ground up, o11n is an AI-augmented IDE to facilitate faster development on projects of any kind
- Using a custom prompting interface with any LLM, users are able to make changes to apps very quickly and integrate new features without lengthy onboarding processes.

### Senna Automation LLC - [Link to project](#)

*Founder*

**Grand Rapids, MI, USA**

*December 2024 - Present*

- Custom AI automation and software development for small local businesses

## EDUCATION

---

### Grand Valley State University

*Bachelor's, Computer Science*

**August 2006 - August 2010**
